DESIGN TO ALIGN

## WHAT ARE 3D - ALIGNER'S

3D Aligner's are customized aligner which are digitally planned in software to best fit for the patient. 3D Aligner are practically invisible as the aligner itself is transparent in nature which reflects the underlying tooth colour. Each set of aligner is planned in a way to bring about desired tooth movement (as planned digitally in software) with least discomfort to the patient and easy to wear and remove as directed by Orthodontist / Dentist.

## WHY 3D - ALIGNER'S

Effective & Fast

Removable

Comfortable

No Dietary Restriction

Nearly Invisible

## Integrating 3D - Aligner's Into Your Practice

You can collaborate with us by following the process which comprises of following 3 Phases.
